

Tenure-Track Faculty Positions in the Department of Chemistry at Clemson University

The Department of Chemistry at Clemson University invites applications for two tenure-track faculty positions, one in physical chemistry and one at the interface of materials science and chemical biology. Candidates with research experience in physical chemistry, especially those with biological interests, and candidates with research interests in solid state materials, polymers, biomaterials, and chemical biology, are encouraged to apply. Candidates must possess a Ph.D. degree in Chemistry or related field, and will be expected to teach chemistry courses in their area(s) of expertise at the undergraduate and graduate levels and to vigorously pursue extramural research funds in order to sustain a developing research program. The potential for collaborations with groups in the Clemson University School of Materials Science and Engineering, the Department of Bioengineering, and with Prisma Health (formerly the Greenville Hospital System) provides for a rich set of opportunities for integrated research activities.

The department boasts a collegial, collaborative environment with a strong institutional commitment to the achievement of diversity among its faculty, staff, and student body. We are particularly interested in receiving applications from women, underrepresented minorities, and from those who have experience and/or a commitment toward mentoring students from diverse backgrounds, as well as those who have demonstrated a commitment to understanding the challenges in promoting diversity and inclusion in the sciences, and particularly in Chemistry. Additional information on Clemson University's diversity and inclusion initiatives can be found at <http://www.clemson.edu/inclusion/>.

The positions are expected to be filled at the rank of Assistant Professor beginning August 15, 2020. Application materials including curriculum vitae, a description of proposed research plan(s), teaching philosophy, short statement describing the candidate's experience mentoring diverse individuals and/or how the candidate plans to contribute to the inclusive excellence of the department, and three letters of reference (pdf preferred) should be uploaded to Interfolio: <https://apply.interfolio.com/68379> (Physical Chemistry) <https://apply.interfolio.com/68380> (Interface of Materials Science and Chemical Biology)

Full consideration will be given to applications received by November 1, 2019; however, applications will be accepted until a suitable candidate is found.

Clemson University is an Affirmative Action/Equal Opportunity employer and does not discriminate against any individual or group of individuals on the basis of age, color, disability, gender, pregnancy, national origin, race, religion, sexual orientation, veteran status or genetic information. Clemson University is building a culturally diverse faculty and staff committed to working in a multicultural environment and encourages applications from disadvantaged minorities, women, and transgender individuals.
