

Tenure Track Assistant Professor
Department of Chemistry & Biochemistry
Swenson College of Science and Engineering
University of Minnesota Duluth

The Department of Chemistry and Biochemistry in the Swenson College of Science and Engineering at the University of Minnesota Duluth has a tenure track assistant professor position in experimental materials chemistry available starting August 19, 2019.

The position is a new hire planned for the new Applied Materials Science (AMS) program at UMD. Duties: Teaching graduate level polymer and/or materials science courses; teaching lower level undergraduate chemistry courses and upper-level undergraduate or graduate-level in their specialty areas in the Department of Chemistry and Biochemistry, Research, and Service.

The Department of Chemistry and Biochemistry is particularly interested in applicants with an interest in experimental materials chemistry.

Required Qualifications:

- PhD in chemistry or closely related field from a regionally accredited university
- Evidence of potential to develop a successful independent, externally funded research program in experimental polymer materials chemistry
- Evidence of teaching experience, such as serving as a teaching assistant or instructor
- Ability to communicate effectively in written form

For a complete job description and to apply online, go to <https://humanresources.umn.edu/jobs> and search for job ID 327929. Complete applications will be reviewed beginning January 7, 2019 until April 1, 2019.

The University of Minnesota is an equal opportunity educator and employer.
